

001773*TouchPoint keyless pushbutton cam lock w/ bracket & cams***Overview**

TouchPoint is designed to replace a standard cam lock in a variety of storage cabinets or enclosures. It has a ten-digit pushbutton keypad with a changeable combination and a clutch mechanism that protects from forced entry.

Construction and installation

It consists of a solid die cast body. The TouchPoint lock can be mounted on top of the door surface or flush mounted into the door.

Operation

Make sure the OPEN switch is in home position (horizontal).
Push the number buttons of your combination.
Turn the OPEN switch clockwise to open.
Turn the OPEN switch anti-clockwise to the home position to close

Applications

The TouchPoint lock is actually an ideal OEM product for storage furniture manufacturers to add value and ease of use to the locking mechanisms of their products. It can be used on all kinds of storage enclosures like medicine cabinets, gun boxes, courier pick-up boxes, tool boxes, private files cabinets, display cases, supply cabinets,...

Guidelines

When programming your access code, we recommend that you NEVER use a birth year or other obvious combination code. A combination consisting of between 5 and 7 digits is recommended.

Please remember that TouchPoint lock is a convenience product, not a security product

**Standard Features**

- **Heavy-duty die-cast construction**
- **Change combination as often as needed - 1024 possible combinations**
- **Clutch mechanism to protect from forced entry**
